DETAILED ACTION

Specification

The amendment filed 3/17/06 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: all the amendment to change the term "precharge" to --prestart--. It is confusing since it implies the terms were interchangeable.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishimura et al. (US 6,313,546). The reference discloses a power supply assembly for a vehicle having, *inter alia*, a high and a low voltage bus (10, 11), a dc converter (12), contactors (8, 14), high voltage cells (15) and low voltage cells (16). During start-up, energy is transferred from the high voltage bus to the low voltage bus thru the

converter. High voltage cells and low voltage cells are being recharged during pre-charging of the buses. See column 3, line 15 to column 4, line 50. Switches (8, 14) or contactors are used to isolate the buses. See column 4, lines 60-65. See figure 2.

Response to Arguments

Applicant's arguments filed 3/17/06 have been fully considered but they are not persuasive. Applicant seems to interchanging the meaning of the term "prestart" and "precharge" in the amendment to the specification. The drawings of figure 2 shows all the claimed steps are done after initiating the precharging 82 and before ending the prestart process 110. Moreover, there is no step between the start 106 and stop of prestart 110. Therefore the claimed steps are done during precharge (prestart?). Moreover claim 22 seems to confirm this algorithm.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
